

N2807 Industrial PC

Based on faytech's own industrial mainboard fay-002. The fay-002 series follows the highest industrial PC standards and provides stable performance. Powered by Intel® Dualcore N2807 and Quadcore J1900 processors based on Silvermont architecture, they deliver respectively 2 x 1.58 GHz and 4 x 2 GHz CPU frequency, which significantly improves the performance of touch PCs. Additionally, the Intel® graphic chip adds stronger graphic performance. On top of that, all of these components are compacted in a fanless design!

the small industrial PC delivers all industrial and consumer connectors needed and comes equipped with 4Gbyte DDR3 RAM, and reliable 64GByte SSDs. Without moving parts faytech's industrial PC fits perfect for harsh environments. Besides this, the system is shipped with an actual Linux Ubuntu version preinstalled.
